

1. Executive Summary

- 1.1 This report sets out the calculation of Harborough District’s five-year housing supply position, taking into account the requirements of the NPPF (July 2018) and covers the period **from 1 April 2018 to 31 March 2023**.
- 1.2 In July 2018 the Government published a new NPPF which contains some changes to how the 5 year land supply should be assessed.

The calculation is set out in detail on page 3 of this report. Table A below provides a summary.

Annual Local Housing Need	542 dwellings per year
Annual Local Housing Need with 5% buffer	569 dwellings per year
Total completions, 1 April 2017 to 31 March 2018	580 dwellings
Projected housing supply, 1 April 2018 to 31 March 2023	3,949 dwellings
5 Year Housing Land Supply, 1 April 2018 to 31 March 2023	6.94 years

Table A – 5 Year Supply Summary

2. Methodology

2.1. Housing requirement

The adopted Core Strategy (2006 to 2028) sets a housing target of 350 dwellings per annum, based on the now revoked Regional Spatial Strategy. However, the Core Strategy is more than five years old and therefore the five year supply is calculated using the local housing need figure of **542 dwellings per annum**, as required by paragraph 73 in the NPPF:

- *“Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites. Local planning authorities*

should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies³⁶, or against their **local housing need where the strategic policies are more than five years old**³⁷”.

2.2. Housing Delivery Test and buffer

In addition, the NPPF indicates that an appropriate buffer should be included and sets out the circumstances when a 5%, 10% or 20% buffer should apply. The determining factor here is whether ‘there has been significant under delivery of housing over the previous three years’ measured against the Housing Delivery Test.

The Housing Delivery Test is a percentage measurement looking at the balance between net homes delivered and the number homes required, over a rolling three year period.

Under transitional arrangements the Housing Delivery Test rulebook¹ stipulates that local planning authorities should apply official household projection statistics as the housing requirement figure for planning years 2015/16, 2016/17 and 2017/18 (paragraphs 21 and 22, including footnotes 18 and 19). The resulting calculation for all Local Planning Authorities will be published by the MHCLG in November 2018. However, initial calculations suggest a comfortable pass for Harborough District at c.143%².

	2015/16	2016/17	2017/18	Total	HDT
Completions over last 3 years	640	468	580	1688	143%
Requirement: Averaged household projections	390	390	400	1180	

Table B –2017/18 Housing Delivery Test

In accordance with paragraph 73 of the NPPF, a 5% buffer has been added to the local annual housing need figure, “to ensure choice and competition in the market for land”, bringing the annual requirement to **569 dwellings per annum**, for the next 5 years.

As illustrated in Table C, applying the housing requirement as set out in the submitted Harborough Local Plan 2011-2031 (557 p.a.), the Housing Delivery Test yields a result of 101%² above the NPPF requirement of 95%.

	2015/16	2016/17	2017/18	Total	HDT
Completions over last 3 years	640	468	580	1688	101%
Requirement: Submitted Harborough Local Plan 2011-31	557	557	557	1671	

Table C – HDT measured against the housing requirement set out in the submitted Harborough Local Plan 2011-2031

2.3. Windfall allowance

The NPPF supports the inclusion of a Windfall allowance in the 5 year supply if there is compelling evidence that suggests this is a consistent and reliable source of land supply. Evidence presented in Appendix 5 of this report indicates that both past delivery and possible future supply could comfortably deliver at least 25 dwellings per year. To allow for greater robustness, the annual windfall allowance does not apply to the first two years of the 5 Year Supply. This will ensure that any un-planned for sites will have adequate time to gain planning permission and deliver residential dwellings.

Appendix 3: 5 Year Supply Site Assessments *

Appendix 4: Current Capacity on Small Sites

Appendix 5: Justification of Windfall Allowance

* **NB:** If there is a discrepancy between a site's build rate projection, the total units permitted, and the residual number of houses it is ordinarily due to a time lag in receiving completion notices. When this occurs, the difference is added into the 1st year of supply in the projection table (2017/18). The completion figures will be reviewed again in 6 months by which time they should tally. Any large discrepancies between the number of completion notices and the projected build rate, have been clarified by Officer site visits.

Appendix 1, Table 1: 5 Year Housing Supply Summary

Scenario	Annual Requirement	Total Units in the 5 Years Supply	Next 5 Years: Over supply/shortfall	5 year supply (years)
District Requirement	542	3949	1239	7.29
Requirement including 5% Buffer	569	3949	1104	6.94

Appendix 5 - Justification for Annual Windfall Allowance

Para 48 of the Framework states

‘Local planning authorities may make an allowance for windfall sites in the five-year supply if they have compelling evidence that such sites have consistently become available in the local area and will continue to provide a reliable source of supply. Any allowance should be realistic having regard to the Strategic Housing Land Availability Assessment, historic windfall delivery rates and expected future trends, and should not include residential gardens.’

Windfall calculation

The Council has assessed both large and small sites, only counting windfall sites that meet the NPPF definition above, and therefore excluding all sites that are residential gardens. Sites that have previously been included within the Council’s Strategic Housing Land Availability Assessment (SHLAA) have also been excluded from windfall development.

Large sites

Since 2011, over a 5 year period the Council has permitted a total of 565 dwellings on 23 sites of 5 dwellings or more that are identified as windfall sites.

However, this figure includes the significant sites of Northampton Road, Market Harborough (110 dwellings) and Beeby Road, Scraftoft (178 dwellings). These sites are not considered to be in accordance with the NPPF definition above, with Northampton Road, Market Harborough previously identified in the 2001 Local Plan as an employment allocation, and the Beeby Road, Scraftoft site included as a reserve site within the Scraftoft Neighbourhood Plan.

When excluding the sites above, 40 dwellings per annum are considered to comply with the NPPF definition for windfalls on large sites of which 10 dwellings per annum are from urban areas (Market Harborough, Lutterworth, Broughton Astley and the Principal Urban Area). This **10 dwellings per annum** from urban sites is carried through to the final windfall allowance only, with all large sites in rural areas onwards expected to be identified in the SHLAA or through Neighbourhood Plans, and therefore not meet the NPPF definition, and are expected to count towards the Local Plan target allowances for rural settlements. Adding in large rural sites to the windfall allowance may result in double counting.

Small sites

Small sites (less than 5 dwellings) were assessed from permissions in 2012/13 and 2013/14, to allow for an understanding of small site lapse rates as well as an amount of windfalls per annum.

Both years 2012/13 and 2013/14 demonstrated a 10% lapse rate of permissions not commenced.

For small sites, only urban and open countryside sites have been included within the windfall calculation. Future windfall dwellings on small sites in both Rural Centres and Selected Rural Villages are expected to count towards the Local plan target allowances for these rural settlements, and as such these are excluded from the windfall allowance. This allows for Rural Centres and Selected Rural Villages to count all additional infill and additional development towards their Local Plan target. Total permissions for small sites in urban areas and in the open countryside, including a 10% lapse rate, are **15 dwellings per annum**.

The above information indicates that both past delivery and possible future supply could comfortably deliver at least **25 dwellings per annum** as windfall sites. To allow for greater robustness, the annual windfall allowance does not apply to the two years of the 5 Year Supply. This will ensure that any un-planned for sites will have adequate time to gain planning permission and deliver residential dwellings.
