

Measuring what matters – understanding, evidencing and celebrating the difference you make.

You've built it, installed it, bought it, or improved it - but how do you show the real difference it's making to people in your community?

Whether you've installed playground equipment, refurbished your village hall, purchased equipment for physical activity, created environmental improvements or something else, join us to learn how to capture and demonstrate your project's real impact on your community.

This can help you with evidence for future funding, attracting more participants and promoting what you've achieved.

Join us for a free, practical short webinar designed specifically for town and parish councils and meetings and voluntary and community groups in the Harborough district and delivered by Harborough District Council community engagement and grants staff.

You'll learn:

- What all the jargon means – the difference between outputs, outcomes and impact.
- What's important to funders.
- Simple ways to measure the difference your projects make without creating lots of extra work.
- How to collect stories and evidence that show your project's value.
- Quick wins you can implement immediately.

It will also be a chance to hear what else is happening across the district and make new connections.

When: Thursday 29 January 2026 10-11.30am

Where: Teams - online (link sent on booking)

Book your place: [Grants Webinars](#)

Can't make this date? Let us know and we'll consider running another session.
